Water-borne paint for wooden façades

- ✓ Protects wooden surfaces from moisture and the external influences
- ✓ Elastic coating
- ✓ Can be tinted. Manufacturer-supplied colours: beige, yellow, brown, green, red, dark grey, black

Description **Properties** Water-borne acrylate paint with added oil for long-term protection of wooden façades. Provides good adhesion Creates a beautiful solid coating with semi-matt shimmer After drying, forms an elastic film which does not crack or peel The paint contains components which protect wood from the external influences Long-lasting high weather resistance: can withstand rapid temperature and humidity changes. The paint will retain it protective and decorative properties or at least 12 years provided that our recommendations for surface preparation, paint application and coating use and maintenance are followed Vapour-permeable Contains wax which protects the painted surface from dirt and makes it easier to clean Long-lasting colour intensity of the coating Contains a corrosion inhibitor Dries quickly, which reduces the risk of the fresh coating being washed off by precipitation Maximum permissible EU VOC content for this product (subcat. d): 130g/L; maximum VOC content in the product <130g/L Semi-matt (approximately 25) Purpose Exterior walls of wooden façades, siding boards, fences, etc. New and previously painted sawn and planed wooden surfaces outdoors (wooden facades, siding boards fences Types of surfaces for painting etc). The paint is not suitable for painting horizontal surfaces and oil-treated wood Quality standards and VOC (volatile organic compounds) - content in accordance with the European Union directive 2004/42/CE labels Product and service quality is guaranteed by the quality, environmental protection, occupational health and safety management system in accordance with standards ISO 9001:2015; ISO 14001:2015 and

teet the surfaces damaged with mould; then rinse them with water and dry. Remove the darkened areas of the wood mechanically, using a self brush, and replace dead wood. Prime the surface to be painted with the Biostop or Biostop Agua deep-penetrating primer. Clean knot locations from resin streaks and prime with special variants. Clean metal parts from rust and pre-treat them with anticorrosive primer. Prime smooth planed surfaces with Veranda Primer Agua to improve the achesion of the top court. Privice by painted surfaces. Remove peeling paint (OPS Pro). Clean dirty strande with agent EasyClean. Privice of the dead wood. Clean metal parts from rust and pre-treat them with anticorrosive primer. Pre-treat the surfaces cleaned to bare wood with the Biostop or Biostop Agua deep-penetrating primer and prime with Veranda Primer Agua. Finish outdoor surfaces so that the surface can dry before the evening dew falls. We do not recommend performing the application in direct sunlight or at high temperatures. Please pay attention to the constructional methods of protecting wooden surfaces: good waterproofing of walls and the roof, water drainage and ventilation. The result of using wood protection products depends on the adequate use of constructional methods of the protecting wooden surfaces. Application Silf the paint thoroughly before application. Miving a large quantity of the product in one container is recommended for ensuring that the colour of large surfaces is even. The surface to be painted must be dry and clean (moisture content must not exceed 20%), air temperature must be above +5 °C, and relative humidity and to exceed 80%. The paint paint as the diluted with water in the amount of 5-10% of its volume for the application of the first coat. Apply 1-2 coats of the paint. Apply evenly from edge to edge along the grain. Prime and paint can be diluted with water in the amount of 5-10% of its volume for the application of the first coat.
